

Design Recommendation: Average MSE by Incidence Mode

Rank labels shown above bars (1 = best). MLE estimator.

Design Recommendation: Average Coverage by Incidence Mode

Red dashed = nominal 95%. MLE estimator.

Design Rank Trajectories across Rho

Incidence: iid Uniform | Rank 1 = lowest avg MSE

Design Rank Trajectories across Gamma

Incidence: iid Uniform | Rank 1 = lowest avg MSE

MSE Distribution by Design, Conditioned on Rho

Incidence: iid Uniform | Designs sorted by median MSE

MSE Distribution by Design, Conditioned on Gamma

Incidence: iid Uniform | Designs sorted by median MSE

Best Design by Rho x Gamma

Incidence: iid Uniform | Cell = best design (lowest avg MSE across other params)

Design Rank Trajectories across Rho

Incidence: Poisson (rho_X = 0.20) | Rank 1 = lowest avg MSE

Design Rank Trajectories across Gamma

Incidence: Poisson ($\rho_X = 0.20$) | Rank 1 = lowest avg MSE

MSE Distribution by Design, Conditioned on Rho
Incidence: Poisson (rho_X = 0.20) | Designs sorted by median MSE

MSE Distribution by Design, Conditioned on Gamma

Incidence: Poisson ($\rho_X = 0.20$) | Designs sorted by median MSE

Best Design by Rho x Gamma

Incidence: Poisson (rho_X = 0.20) | Cell = best design (lowest avg MSE across other params)

Design Rank Trajectories across Rho

Incidence: Poisson (rho_X = 0.50) | Rank 1 = lowest avg MSE
