

Distribution of Estimation Error (MSE) by Spatial Contiguity

Incidence: Poisson ($\rho_X = 0.20$)

Heatmap of Error by Spatial Dependence & Neighbor Type

Incidence: Poisson (rho_X = 0.20)

MSE Dynamics for Design 1

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 2

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 3

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 4

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 5

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 6

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 7

Incidence: Poisson ($\rho_X = 0.20$)

MSE Dynamics for Design 8

Incidence: Poisson ($\rho_X = 0.20$)

Design Comparison: Mean Squared Error across Scenarios

Queen Contiguity | Incidence: Poisson ($\rho_X = 0.20$)

Design Comparison: Mean Squared Error across Scenarios

Rook Contiguity | Incidence: Poisson ($\rho_X = 0.20$)

95% CI Coverage Probability by Design

Incidence: Poisson ($\rho_X = 0.20$) | Red dashed = nominal 95%

Design Rank Distribution across Scenarios

Incidence: Poisson ($\rho_X = 0.20$) | Rank 1 = lowest MSE in that scenario

Bias-Variance Decomposition of MSE

Incidence: Poisson ($\rho_X = 0.20$)

Bias-squared Variance

Coverage vs MSE Tradeoff

Incidence: Poisson ($\rho_X = 0.20$) | Each point = 1 scenario | Red dashed = nominal 95%
